propagated M: acuminata ssp. burmannicoides var. Calcutta
4 (AA) plants, 30 cm high, were used in this study. These
plants were obtained from the Banana Germplasm Bank at
Embrapa Cassava and Tropical Fruits, Cruz das Almas,
Bahia, Brazil (Muss Germplasm Information System - MGIS
accession number ITC0249). Prior to temperature stress
conditions, banana plants were maintained for 48 hours in
an environment chamber at 250C with 80% air humidity, and
a 16 hour light/8 hour dark cycle. Leaf samplasm the
rise to 350C, samples were collected after one (H1), two
(H2) and three (H3) hours. With the temperature raised to
450C, new samples were collected after one (H4), two
(H5), three (H6), nine (H7), and 21 hours (H8) following
the change in temperature. Tissues were immediately frozen
in liquid N and stored at -800C until total RNA
extraction. Total RNA was isolated using the plant RNA
extraction. Total RNA was isolated using the Plant RNA
extraction. Total RNA was isolated using the Plant RNA
extraction mamples were combined in equivalent
quantities. The resulting bulked sample (I mg of total
RNA) was then submitted to poly (A) + RNA purification
using the Pastrack 2.0 mRNA isolation Kit (Invitrogen).
Pull length cDNA enriched, non-normalized, cDNA library kit
and cloned into the pDNR-LIB vector (Clontech).

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 75;

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Sequence 75,
